

DSTypes.h

```
graph TD; DSTypes.h --> stdio.h; DSTypes.h --> stdbool.h; DSTypes.h --> stdarg.h;
```

A diagram illustrating the relationship between header files. At the top is a gray box labeled 'DSTypes.h'. Three dark blue arrows point downwards from this box to three white boxes below it: 'stdio.h' on the left, 'stdbool.h' in the center, and 'stdarg.h' on the right. This indicates that 'DSTypes.h' is a parent header file that includes or defines symbols for these three other header files.

stdio.h

stdbool.h

stdarg.h
